

The Little House of Hope: Math Problems

Families moving to the United States as immigrants or refugees have to find a way to pay for a home, all the things that keep a home running (like electricity), transportation to work, food, clothing, and other things.

Math is not hard for them, but sometimes it is “hard to get it to all add up.” This phrase means that a family’s **income** (what family members make at their jobs) is often less than their **expenses** (all the things they have to pay for).

Expense: Rent

Esperanza’s family emigrated from Cuba and “looked and looked for a place where they could live that didn’t cost too much money.” Paying rent for a house or apartment was their first and biggest expense.

If Esperanza’s family was settling in Florida today and wanted to rent *una casita*, they could rent a three-bedroom house for \$2,500 a month. Before the family can move in, the landlord would ask them to pay the first month’s rent, the last month’s rent, and a security deposit of \$2,500. **How much money would Mami and Papi need to give the landlord to move in?**

Income

Mami and Papi took on two jobs to help pay for their little house of hope. If they were settling in Florida today, their minimum wage positions as a painter, grocery store clerk, laundromat clerk, and waitress would bring home \$4,000 a month. **After Mami and Papi pay rent, how much money do they have left over?**

The Little House of Hope: Math Problems

Refugees

Refugee: A person who is unable to return to his or her country of origin because of a well-founded fear of persecution based on race, religion, nationality, political opinion, or membership in a particular social group. *For this exercise, we are talking about refugees who are officially approved, invited, and resettled by the federal government.*

Some people believe that the US government gives lots of money to officially resettled refugees and that they give this money to refugees for a long time. In truth, the longest most refugees receive assistance is 8 months.

How much money do refugees actually receive? You can do the math!

If Esperenza's family had been officially resettled as refugees by the federal government, this is the help they would have received from the government. **What is the total amount?**

Assistance	Amount Given	How Many Times	Total
Resettlement Funds	\$900.00	1	
Match Funds	\$1050.00	3	
Refugee Cash Assistance	\$611.00	8	
		Total	

These numbers are based on the circumstances of the book's fictional family as applied to the parameters of this document from Catholic Charities Refugee & Immigrant Services.

Think about all you have learned about a family's expenses and minimum-wage jobs.

Do you think refugee families—who often arrive with nothing but their clothes—should get help from this country for the first 8 months? Tell us why or why not.
